7.1.7 – Initiatives taken by the institution to make the campus eco-friendly (at least five)

1) Students and staff using public transport: Most of the outstation students (around 60) stay in hostel buildings. Hence, in short around 50 of the student population stay in hostels. To cater for remaining day scholar students, The institute is running bus services across Kerala and Tamil Nadu. 2) Plastic free campus: Notices are put up in the campus to refrain from use of all types of plastics. In addition, security is alerted to stop plastic bags coming in the campus at the main gate. Cafeteria, student rooms are monitored for all such usages and an attempt is made to completely eradicate any use of plastic on campus. 3) Green Landscaping with trees and plants: The Institute is well known for its Clean and Green campus. We have lush green campus with around 540 trees with a Garden Land (Soil) . Hence around 49 of the total area is covered with Garden Land (Soil). Organic fertilizers are used for all the trees and we have grown organic vegetable garden including plants and these vegetables are made available to faculty and staff members every week (based on availability) on firstcome, firstserve basis. Waste water from hostel buildings is used for gardening the trees and lawns. LPG gas is used in the Canteen for cooking and Solar water heating systems are provided on roof top of hostel buildings. 4) Institution has following practices to conserve energy by electronic equipments By Seeking out computing related equipment and services have the lowest. footprint possible. Ensuring that all computers have activated power management software to minimize energy consumption and put the computer in sleepy mode when not in use. Always turn off monitors. Adopt guidelines for extending the life of computers and components (i.e. follow manufacturers guidelines) and maximize (i.e. reuse, repair, recycle). Minimising the paper work and wastages go through ecofriendly recycle process. • 1. Use electronic method for the information / circulation/ notices etc. (thus. minimizing paper use) 2. College employees go for policy of reuse, repair, recycle wherever possible in there working 3. Constructions are well ventilated and lighted and needs no artificial lighting. Still the institution has installed CFLs and LED'S, this has helped a lot in conservation of electricity. Use of renewable energy? The campus has a solar lighting system in the campus. Water harvesting? The Institution is designed on Themed landscaping projects. Many constructional aspects are meant to conserve water, harvest rain water to best of its potential. A water recharge pit has been constructed in the campus. RainWater harvesting project is now functional in the campus. There is 100 water recycling in the campus. This has also helped in converting the campus into a green campus, which is based on Recycled water 5) Land identified for Miyawaki method of afforestation thereby yielding quicker results

#### 7.2 – Best Practices

7.2.1 - Describe at least two institutional best practices

Best practices1 Best practices1 1. Title of the Practice: MENTORING PROGRAMME Objective: The objective of Mentoring is: To achieve the vision of the institution viz., to develop into a truly Global citizen. To provide a continuous learning process for both the mentor and the mentee. • To establish the mentor as a role model and to support the mentee for personal and academic. development. To establish a vibrant relationship between the teachers and the students that will ensure responsibility of academics discipline The Practice: Mentoring session is conducted every Saturday from 3:00 PM to 3:50 PM on a regular basis. The• session is compulsory for every students to attend without

fail. Mentors are assigned some students for the whole duration of a semester each .i.e. six months.. The mentoring parameters are based on four aspects i.e. academic, attendance, career and general. The mentors are provided with details of mentee's performances in terms of academic (weekly test, • class test, midterm and endsemester exam) and attendance records. The mentor also keeps track of the mentee's personal development such as cocurricular activities, discipline and career related issues. Best Practice2 Title: Use of social media as teaching learning method. Objectives: To encourage the development of transferable, technical, and social skills (TTS) of value in formal and informal learning. To promote participatory culture among students space that allows engagement, sharing, mentoring, and an opportunity for social interaction. To discuss /share curriculumrelated content and enhance the prescribed curriculum for students. To emphasize specialized in communication. To improve student comprehension To enhance student networking and collaboration with other nurture globally To use this technology beyond electronic medical records (EMR) and personal computer word processing programs To use the advanced technology in the teaching learning process. To make the teaching learning process more interesting. To get feedback from the students To post assignments, questions, readings, and grades as well as ways to interact with the students through forums or chats. To provide a virtual "space" for learners. The Context: Students are changing, and those once effective teaching methods are becoming stale. Faculty, and campus administrators, can utilize social media as a tool for creating new ways to engage students and demonstrates to them a variety of uses for the internet and their favorite sites. One of the biggest challenges in online education is the lack of interaction between students where as this blogs try to provide more opportunities for discussion and communication. By this we meet the twin objective of Using ICT in day to day Class rooms and exposing students to new age Technology
